

**INFORMATION REQUEST · PRE-LAUNCH**

What we need from you to **go live**

The Cash Flow Mastery website and checkout are built and tested. This document lists everything still outstanding on your side, grouped by what blocks launch and what can follow.

Dear Sir,

Thank you for the detailed developer brief. We have now completed the public website and the payment flow for the founding cohort, built to the structure you set out — the home page, sales page, About page, the free Cash Visibility Diagnostic, FAQs, the waitlist, and a secure checkout.

Everything that could be built without your input is finished. What remains is information only you and your advisers can provide: your payment account details, the tax position, the legal wording, the cohort dates, and the course materials themselves.

We have set the site up so that nothing has been invented in your name. Where a figure or a policy was unknown to us, the page either omits it or shows a neutral placeholder rather than a guess — most importantly, the five legal pages exist only as section outlines, carry a visible “not in force” notice, and are hidden from search engines until your adviser supplies the approved wording.

Please work through the items below at your convenience. Each one carries a short reference such as **P1** or **L3**, so you can reply against them directly without quoting the whole document.

The five items that block launch

Everything else can follow after the site is live. These five cannot — the site either cannot take a payment, or would be showing something to a buyer that has not been approved.

- | | |
|-----------|--|
| P1 | A Stripe account on the UAE entity that will sell the course, activated for AED. |
| P4 | Your VAT position — whether AED 2,000 is inclusive or exclusive of 5% VAT. |
| P5 | The refund terms, as they will actually apply. |
| L1 | Approved wording for the five legal documents. |
| C1 | The cohort start date and the four live-session dates. |

01 Payment integration

6 items

The checkout is built on Stripe, which handles the card entry inside its own secure frame. This means card details never reach your website, and you carry no card-data liability. We need the account itself and the tax treatment to switch it on.

P1 A Stripe account on the selling entity

BLOCKING

Stripe must be opened in the name of the UAE entity that will actually receive the course fees, and activated to charge in AED.

- Legal entity name, trade licence number and registered address
- The UAE bank account that will receive payouts
- Confirmation the account is activated for AED, not USD only

WHY WE NEED IT

Without a live account we cannot take a single payment. Please note Stripe does not onboard every UAE entity type — if your application is declined, tell us early and we will switch the checkout to a local gateway such as Telr, PayTabs or Network International. That change is roughly a day of work, but only if we know before launch.

P2 API keys and webhook access

BLOCKING

Once the account exists we need technical access to connect it. The safest way to give us this is to invite us to your Stripe dashboard as a developer, so you keep ownership and can revoke access at any time.

- A developer invitation to the Stripe dashboard, or the publishable and secret keys
- Permission to create a webhook endpoint on your domain

Please do not email the secret key

Sir, a Stripe secret key can move money and issue refunds. Please do not send it by email or WhatsApp. A dashboard invitation is safer and takes a minute; if you would rather send keys directly, we will set up a secure one-time link for you.

P3 Pricing confirmation

BEFORE LAUNCH

We have built the pricing exactly as your brief describes it. Please confirm it is still correct, as the price is set by the website and cannot be altered by the buyer.

- AED 2,000 for the first five places
- AED 2,500 for the remaining places
- A maximum of 15 participants in the cohort
- Payment in full to secure a place, with no instalment option

P4 VAT treatment

BLOCKING

This needs to come from your accountant rather than from us. Your own brief requires the tax position to be shown to the buyer before they pay, and we cannot state it without your confirmation.

- Is the selling entity registered for VAT?
- Is AED 2,000 inclusive or exclusive of 5% VAT?
- Does the treatment differ for participants outside the UAE?
- What should appear on the buyer's invoice — TRN, entity name, address?

WHY WE NEED IT

The checkout currently reads “VAT treatment confirmed at checkout”, which is a holding line. If VAT must be added on top rather than included, we enable Stripe Tax and adjust the displayed price — a small change, but the wording has to match the reality.

P5 Refund and cancellation terms

BLOCKING

The site presently shows a placeholder: a full refund if a participant withdraws more than seven days before the start date. This is our assumption, not your policy.

- The notice period and the amount refunded
- The position once the course has started and materials have been accessed
- What participants receive if you cancel or reschedule the cohort

WHY WE NEED IT

This figure appears in three places — the checkout, the FAQs and the refund policy — and all three must agree. It is shown to the buyer before payment, so it has to be your real policy.

P6 Statement descriptor and support contact

BEFORE LAUNCH

- The short name to appear on the buyer's card statement, up to 22 characters — for example CASHFLOWMASTERY
- The email address that should handle payment queries and disputes

WHY WE NEED IT

An unrecognisable name on a card statement is the most common cause of a chargeback. It is a small setting that prevents a real problem.

02 Legal policies

3 items

Your brief instructed us to build the page structure but not to invent the policies, and we have followed that precisely. Five pages exist with the correct section headings, each carrying a visible notice that it is not in force, and each hidden from search engines. They will remain that way until you supply approved wording.

L1 Five documents, reviewed and approved

BLOCKING

We have prepared an outline for each, listing the sections it needs to cover. Your adviser can write directly against those headings.

- **Privacy policy** — what is collected, lawful basis, the processors used (Stripe, email platform, video host, analytics), international transfers, retention, and individual rights
- **Cookie notice** — every cookie set, its purpose and duration, and how consent is managed
- **Course terms of sale** — what is supplied, price and tax, scope of the service, rescheduling rights, intellectual property, recording and confidentiality, liability, governing law
- **Refund and cancellation policy** — matching item P5 above
- **Training disclaimer** — education rather than regulated financial advice, no guaranteed outcomes, and how this relates to Independent Advisors

THIS MAY BE QUICKER THAN IT LOOKS

independentadvisors.ai already carries a privacy policy, cookie policy, terms and conditions, copyright policy and disclaimer. If the same adviser drafted those, adapting them for Cash Flow Mastery will be considerably faster than starting again — the privacy and cookie notices in particular need little more than the new processors added (Stripe, the email platform, the video host and analytics). The terms of sale is the one genuinely new document, because Independent Advisors sells advisory services rather than a fixed-price course with a refund window.

L2 Governing law and jurisdiction

BLOCKING

- Which emirate or jurisdiction governs the terms of sale
- How disputes are to be resolved
- Whether participants outside the UAE are treated differently

WHY WE NEED IT

You are selling across the GCC and possibly further. If any participant is an EU resident, GDPR applies alongside the UAE PDPL, and the privacy policy has to address both.

L3 Recording and confidentiality policy

BEFORE LAUNCH

The live sessions involve owners discussing their actual financial position in front of one another. The rules for that need to be written down and agreed before the first session.

- Are the live sessions recorded?
- If so, how long are replays available, and to whom?
- What do participants agree regarding each other's information?

WHY WE NEED IT

Two FAQ answers currently refer to a “recording policy” that does not yet exist. It also affects your confidentiality commitment in the terms of sale.

03 Cohort details

4 items

The website is built to display these automatically once you provide them. Every date field currently reads “dates announced to the waitlist first”, which is honest but will not sell places indefinitely.

C1 Dates and times

BLOCKING

- The cohort start date
- The four live-session dates
- The time of day, which we will publish in Gulf Standard Time
- Expected session length — we have assumed 60 to 75 minutes

WHY WE NEED IT

Your brief requires the cohort start date to be visible at checkout before payment. This is the single most common reason a considered buyer does not complete a purchase — they cannot tell whether they are free on the dates.

C2 Live session platform

BEFORE LAUNCH

- Zoom, Google Meet, or Microsoft Teams
- Whether you want calendar invitations sent automatically on enrolment

C3 Access period after the cohort ends

BEFORE LAUNCH

The FAQ currently says access “continues” after the cohort finishes, which we left deliberately vague pending your decision. Buyers do ask this before paying.

- How long do participants keep access to lessons and templates?
- Is it lifetime, twelve months, or tied to the cohort?

C4 Minimum cohort size and future pricing

WHEN CONVENIENT

- Is there a minimum number below which the cohort will not run?
- Does founding pricing apply to a second cohort? The waitlist page currently says it does not.

G4 Course content and assets

4 items

These are needed for the cohort to run rather than for the site to go live, with one exception — your photograph, which the About page needs.

A1 A photograph of yourself

BEFORE LAUNCH

Your brief rules out institutional finance imagery and generic stock visuals, and we have followed that — there is no photography anywhere on the site. That was the right instruction, but it means the one portrait we do use has to be a genuine one of you.

- A professional portrait, landscape or square, at least 1200px wide
- Permission to use it as the social sharing image when the site is shared

A2 The templates and worksheets

BEFORE THE COHORT

Final versions of the six documents listed in your brief, so we can prepare them for controlled download.

- The 13-week cash-flow forecast workbook — the approved Excel file
- Cash Visibility Diagnostic worksheet
- Cash-Cycle Map
- Assumptions checklist
- Weekly cash meeting agenda
- 30-day implementation plan

A3 Video content

BEFORE THE COHORT

- The new welcome and closing videos
- The existing module footage you intend to reuse
- Confirmation that captions are required on every lesson, as your brief specifies

WHY WE NEED IT

Your brief correctly rules out serving large video files from ordinary web hosting. We recommend Vimeo Pro or Mux, both of which provide captions, adjustable playback speed and private links. We need your decision before uploading anything, as moving hosts later means re-uploading everything.

A4 Brand assets

WHEN CONVENIENT

We have built Cash Flow Mastery to sit visually alongside independentadvisors.ai — the same navy, cream and gold, the same typefaces — so the two read as one family while keeping distinct page structures.

- Any existing Cash Flow Mastery logo files, if they exist
- Confirmation you are happy with the visual direction, or any changes you would like

05 Accounts and access

4 items

Services that need to be opened in your name, so that you own them rather than us. We will configure each one and hand over the credentials.

S1 Domain access for cashflowmastery.co

BLOCKING

- Registrar login, or the ability to add DNS records on request
- Confirmation that cashflowmastery.co is the final domain

S2 Email platform

BEFORE LAUNCH

Two separate needs, which can use one provider or two.

- **Transactional** — receipts, welcome emails, password resets. We suggest Resend or Postmark.
- **Marketing** — the nurturing sequence and cohort announcements. We suggest MailerLite or ConvertKit.
- A dedicated support inbox, or confirmation to keep using carl@independentadvisors.ai

WHY WE NEED IT

The site already captures consent properly and stores the exact wording each person agreed to, with a timestamp. Your list will be compliant from the first subscriber, but only if it is connected before the first one arrives.

S3 Analytics

BEFORE LAUNCH

Your brief asks us to track leads, checkout starts, purchases and course completion. We have deliberately installed nothing yet, because analytics must load only after cookie consent, and the consent banner depends on your approved cookie notice.

- **Plausible** — no cookie banner required, simplest compliance, around \$9 per month
- **Google Analytics 4** — free, but requires full cookie consent handling. Choose this if you intend to run Google Ads.

S4 Hosting decision

BLOCKING

One technical decision that needs your approval because it carries a small monthly cost.

- **Option A** — host with a persistent disk, around \$5 to \$20 per month. No further development needed.
- **Option B** — add a managed database (Supabase, free to start). Around a day of work, and it is the foundation for the learner area later.

WHY WE NEED IT

The site counts enrolments to control the 15 places and to switch from the founding price to the standard one. On some hosting types that count would reset, which would let more than fifteen people buy, and at the wrong price. We recommend Option B, since it is needed anyway when the learner area is built.

06 Summary

21 items

ALL OUTSTANDING ITEMS BY PRIORITY

REF	ITEM	FROM	PRIORITY
P1	Stripe account on the UAE entity	You	Blocking
P2	Dashboard access or API keys	You	Blocking
P3	Pricing confirmation	You	Before launch
P4	VAT treatment	Accountant	Blocking
P5	Refund terms	Legal adviser	Blocking
P6	Statement descriptor, support contact	You	Before launch
L1	Five legal documents, approved	Legal adviser	Blocking
L2	Governing law and jurisdiction	Legal adviser	Blocking
L3	Recording and confidentiality policy	You	Before launch
C1	Cohort and live-session dates	You	Blocking
C2	Live session platform	You	Before launch

REF	ITEM	FROM	PRIORITY
C3	Access period after the cohort	You	Before launch
C4	Minimum cohort size, future pricing	You	When convenient
A1	Your photograph	You	Before launch
A2	Templates and worksheets	You	Before the cohort
A3	Video content and hosting choice	You	Before the cohort
A4	Brand assets, design sign-off	You	When convenient
S1	Domain and DNS access	You	Blocking
S2	Email platform choice	You	Before launch
S3	Analytics choice	You	Before launch
S4	Hosting decision	You	Blocking

07 Already complete

For your reference

So that you can see what your list above unlocks, this is what is built, tested and waiting.

✓ Public website Home, sales page, About, FAQs, waitlist — built to your brief, with no fabricated testimonials, countdown timers or scarcity devices.	✓ Secure checkout Stripe integration complete. Price, currency, inclusions, refund terms and cohort dates all shown before payment.
✓ Failed payments blocked Access is granted only on a verified payment. An abandoned or failed checkout creates no enrolment — tested.	✓ Capacity control The 15 places and the founding-five price are enforced by the system, not managed by hand.
✓ Free diagnostic A ten-question Cash Visibility Diagnostic that scores the visitor and points them at the week that matters most for them.	✓ Consent capture Every subscriber's consent is stored with the exact wording and a timestamp.

✓ Accessibility

Contrast verified across 788 items of text on every page, with full keyboard navigation.

✓ Mobile and search

Tested down to 375px, with page titles, descriptions and a sitemap in place.

Sir, if it is easier, we are happy to walk through this on a call and complete it together — particularly items P4 and L1, where it may help for us to speak directly with your accountant and your legal adviser.

Once the five blocking items are settled, we can have the site live and taking payments quickly. Everything else can follow while the founding cohort fills.

Thank you for your time, Sir. We look forward to launching this with you.
